Skills

Programming: Python (PyTorch, NumPy), C, C++, Java, C#, JavaScript, Node.js, TypeScript, Elysia.js, Drizzle ORM.

AI & Data: Generative AI (LLMs), Machine Learning (IML), Deep Learning (IDL), Data manipulation (tqdm).

Web Technologies: ASP.NET, Express.js, RESTful APIs, HTML/CSS, OAuth 2.0.

CS Fundamentals: Algorithms, Data Structures, OOP, Computer Architecture.

Databases: PostgreSQL, SQL Server.

Tools & DevOps: Docker, Git, Visual Studio, VS Code, Cloud Hosting(GCP,Render,Azure), CI/CD Automation.

Languages

English – fluent
Hebrew – native

Summary

Third-year Computer Science student at the Hebrew University (**Graduating 2027**) with a "Builder" mindset, seeking a **Software Engineering Student** position. Experienced in architecting **E2E systems**—from **Node.js/ASP.NET** backends to **Flutter** mobile applications—with hands-on expertise in integrating **LLMs (Gemini API)**. As a **CS educator**, I combine strong theoretical foundations in **Data Structures** and **Algorithms** with practical experience in building production-ready, user-centric products.

Experience

E2E Software Engineering (personal projects) | 2024 – Present

- **Languages & Frameworks:** C#, Java, Dart, SQL (PostgreSQL), ASP.NET, Flutter, Node.js (Express.js), Elysia.js (TS), Drizzle ORM.
- **Architecture & Design:** E2E System Design, Database Schema (ERD), OOP, RESTful APIs.
- **Tools & Tech:** Gemini API, Git, API integration, OAuth 2.0, Stripe, Cloud Hosting(GCP,Render,Somee).Cloud Code,CI/CD automation, Docker.
- **Engineering:** Modular Code Design, Debugging, Production Troubleshooting, Deployment.

Computer Science Educator IASA High School | 2024 – Present

- Instructing 5–10 unit computer science courses, including **Java**, **Data Structures**, and **Automata**.
- Mentoring students in software design principles and bridging theoretical knowledge with practical application

Projects

ZCode (Hackathon 2026)

- **Infra & DevOps:** Architected a Monorepo containerized **with Docker**, deployed via **automated CI/CD** to **Google Cloud Run (GCP)**.
- **Backend & Data:** Developed a high-performance system using **Elysia.js (TS)** and **Drizzle ORM** over **Neon PostgreSQL**.
- **AI Integration:** Implemented an asynchronous **inference pipeline** using **OpenRouter** for real-time Socratic **AI mentoring**.
[GitHub Repo](#),[Live Website](#).

MoodCast (AI-Driven Web App)

An E2E movie recommendation platform leveraging **AI agents** to personalize suggestions based on user sentiment. Features secure authentication (Google OAuth) and a relational database management system (**PostgreSQL**), built with **ASP.NET (C#)**.

Education

Bachelor of Science | The Hebrew University of Jerusalem | 2023 – 2027

- Computer Science student, expected graduation: 2027.
- Key Courses: **Programming Workshop** (C & C++: 85), **Data Structures** (87), **Algorithms**, **Computer Architecture**.

Pre-Academic Studies | The Hebrew University of Jerusalem | 2022 – 2023

- Focused on Physics, Mathematics, and Academic Writing.
- Final Grade: 100.
